

Control Solutions for all Sectors

Introduction

With over 40 years experience in control panel and control system design, Weatherite Electrical has built a reputation for offering a level of expertise few companies can match.

From our purpose built factory in the heart of the UK, we design, manufacture, test and deliver bespoke control systems for all sectors of industry. Our solutions range from a simple control panel through to complex motor controls, building & energy management systems and control panels for multi location HVAC plant.

Our Products include:-

- Controls & Instrumentation Panels
- Motor Control Centres
- Custom Solutions
- Distribution Systems
- Switch Gear
- Building & Energy Management Systems

We have extensive expertise in all aspects of control panel design and will manufacture bespoke systems to match the client's individual requirements. Whether it's a small wall mounted unit or multiple, large floor standing enclosures, we utilise the very latest technological advances in software and hardware configuration.

Designed and manufactured in-house, our motor control centres are constructed to the client's specification or, if preferred, we will select the most appropriate equipment to meet the projects exact requirements. From form 2 to form 4, types 1-7, local or remote, manual or automatic control, all our control systems are rigorously tested to ensure correct performance and compliance.

On-Site Upgrade Solutions

Our electrical installation teams are fully trained, fully accredited and totally committed to providing a first class on-site installation service. Although design, configuration, manufacturing and testing are our main areas of expertise, we are often asked if we can undertake installation and replacement services and, if requested by the client, we will undertake this service.

We are an NICEIC approved company which ensures that our work is carried out and certified to British Standards and the latest IEE regulations.

Sectors we work in include:

- Commercial
- Industrial
- Aviation
- Manufacturing
- Automotive
- Utilities

- Pharmaceutical
- Health
- Education
- Food Processing
- Leisure

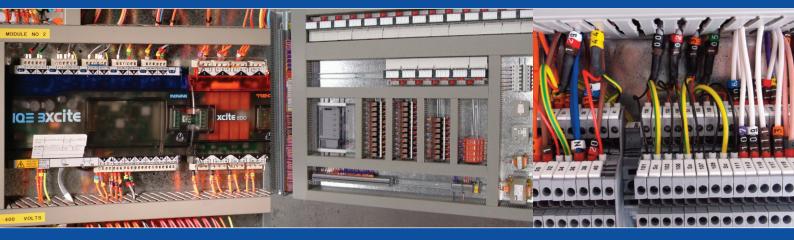

- Telecommunications
- Military
- HVAC
- Petrochemical
- Public Buildings

Our client portfolio includes:

- E.ON
- Jaguar Land Rover
- Heathrow Airport
- Peugeot
- Warwick University
- BET365

- Severn Trent Water
- Birmingham NEC
- Loughborough University
- Waitrose
- Royal Gloucester Hospital
- Ford Motor Company

- South East Water
- GlaxoSmithKline
- M&S
- Gatwick Airport
- BMW
- BBC

A Commitment to Quality

As a company, we are totally committed to the highest standards of quality throughout the whole process from initial survey activity through the design, manufacturing, installation and test processes to final handover and emergency aftercare services. Our staff are highly trained, qualified, skilled professionals who understand the importance of designing a solution that will deliver-for years to come.

The investment in our workforce is matched by our investment in our design capabilities and our manufacturing plant/processes and the equipment our engineers use out in the field.

The company is ISO 14001 and 9001 Accredited and is also a member of all relevant trade associations.
